## Cesium non mobile AIS coverage

This is a demo page showing the nominal range of current known non mobile [AIS](#) <sup>[1]</sup> stations as registered on this site.

### **AIS** <sup>[1]</sup> **station coverage prediction**

[IALA](#) <sup>[2]</sup> provide a Guideline on marine beacon coverage prediction. Coverage is determined through the consideration of a number of factors including propagation effects, noise and interference. The reader is advised to refer to [IALA](#) <sup>[2]</sup> Guideline 1119 for further information.

Below a view of the nominal range (25 NM) of the stations but if they are [eAtoN](#) <sup>[3]</sup> then the range is 15 NM. These are, if something changed in the database, updated every hour. It could be you should refresh you browsers cache with ctrl-F5 to see the latest updates.
